

# Modern Printing Colors

## Company Profile

We are proud to announce that **Modern Printing Colors, Inc.** has been in operation for over eighteen years. We are located in a modern 83,000 square foot facility in Broadview, IL, centrally located in the greater Chicago Metro area between O'Hare and Midway International airports. Our current manufacturing capacity is two million pounds annually, and we have the equipment and space to double that output as we broaden our customer base. Our president and founder, **Suresh C. Mahajan**, has an extensive industry background with technical and executive experience spanning more than thirty-five years. In addition, **MPCI** has a complete and experienced technical and operations staff with combined knowledge of over 150 years.

MPCI has been supplying Color Concentrates directly to Printing Ink Manufactures for over 19 years. Color Concentrates, also know as "**Flushed Color**," represent a major portion of the raw materials purchased by Ink Manufactures. These Color Concentrates are used to produce **Fine Offset Lithographic** Printing Inks and **Water Flexo Printing Inks** for paper, plastic, metal cans, etc. MPCI provides this product to its customers located throughout the USA and worldwide.

Our aim is to consistently provide the highest quality products with the best service possible for our customers. In addition to **Process Colors**, our products include: Hansa Yellow, MX Yellow, Orange, Phthalo Green, Phthalo Blue (Red Shade), Milori Blue, Carbazole Violet, Methyl Violet, Quinacridone Red, Naphthol Reds, Rhodamine (Yellow and Blue Shade), Permanent Yellow and Red, and 2B Red in Heat Set, Sheet Fed, High Solids, Glycol (Moisture Set), UV, and Soya vehicle systems. We also have **Pantone approved** products. We look forward to your sample requests, and working with you to custom develop any products you may require.
